

Spray Polyurethane Foam Applicator

We need an experienced Spray Polyurethane Foam applicator familiar with Building Envelope work. Certification as a Foam Applicator by SPFA or applicator certification by the Air Barrier Association of America is preferred.

Our 20+ yr old company is primarily a residential Building Performance Contracting firm working from a central NY location. We use blower doors and Infra Red to define work, then use cellulose and foam to correct deficiencies in the building envelope. We are in the process of bringing this approach to commercial work.

This is a year round position. Work is semi seasonal, with shorter work weeks in the heat of summer and overtime through the fall & winter. We use primarily closed cell foam in our work.

Pay is negotiable; minimum for this position would be \$12/hr. Health insurance is available with a 50% subsidy from the company after 6 months of service, pension plan is a simple IRA with 3% matching funds available. Vacation, sick pay, holidays are all available after 1 yr of service.

We need an applicator familiar with Graco/Gusmer equipment and building envelope techniques. We do not do roofing work, but we are looking into exterior side wall foam work in commercial applications.

A pre employment Drug Test will be administered, and random drug testing is part of employment here. This is a drug free work place.

All employees must have a valid driver's license; we will perform a pre employment driving history investigation as part of our insurance oversight requirement.

Please send resume's to warminup@insulationman.com and we will send you back a job description and application.
